

UČNI NAČRT PREDMETA/COURSE SYLLABUS

Predmet:	KARAKTERIZACIJA POLIMERNIH MATERIALOV
Course title:	CHARACTERIZATION OF POLYMERS

Študijski programi in stopnja	Študijska smer	Letnik	Semestri
Strojništvo, tretja stopnja, doktorski	Konstruktivno mehanske inženirske znanosti (smer)		Celoletni

Univerzitetna koda predmeta/University course code:

Predavanja	Seminar	Vaje	Klinične vaje	Druge oblike študija	Samostojno delo	ECTS
90					160	10

Nosilec predmeta/Lecturer:

Izvajalci predavanj:	
Izvajalci seminarjev:	
Izvajalci vaj:	
Izvajalci kliničnih vaj:	
Izvajalci drugih oblik:	
Izvajalci praktičnega usposabljanja:	

Vrsta predmeta/Course type:

Jeziki/Languages:	Predavanja/Lectures:	Slovenščina, Angleščina
	Vaje/Tutorial:	Slovenščina, Angleščina

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites:
Veljajo splošni pogoji za doktorski študij.	General prerequisites for the third level studies.

Vsebina:

Linearno - viskoelastičnega vedenje polimerov in kompozitov. Nelinearno vedenje (metoda večkratnih integralov, določitev parametrov modela iz eksperimentalnih rezultatov). Primeri (relaksacija PS in PE pri strižni obremenitvi, lezenje PA pri torziji, lezenje PMMA pri torziji in nategu). Periodično koračno obremenjevanje in razbremenjevanje, obnašanje materiala pri obremenitvi z vzmetjo, razširitev na ostale primere obremenjevanja. Analiza utrujanja polimerov in kompozitov. Akumulacija deformacijskega stanja. Deviatorna in izotropna deformacijska energija. Shranjena in disperzirana deformacijska energija. Meja linearne - viskoelastičnosti. Crazing (deformacijska energija pri lezenju in napetostni relaksaciji, dodatni primeri, poenostavljene relacije). Porušitve in tečenje polimernih materialov. Časovno-odvisnega vedenja kompozitov in nanokompozitov. Mikro- in nanomehanske lastnosti kompozitov. Trdnost ortotropnih

Content (Syllabus outline):

Linear-viscoelastic behavior of polymers and composites. Non-linear behavior (multiple-integral representation, determination of model parameters from experimental data). Examples (relaxation of PS and PE under shear loading, creep of PA in torsion, creep of PMMA in torsion and uniaxial extension). Periodic tooth-like loading, behavior of time-dependent materials under spring loading. Generalization to other modes of loading. Fatigue of polymers and composites. Strain accumulation. Deviatoric and isotropic deformation energy. Stored and dissipated deformation energy. Limit of linear viscoelasticity. Crazing (deformation energy in creep and relaxation, examples, simplified relations). Failure and flow of polymers. Time-dependent behavior of composites and nano-composites. Micro-, and nano-mechanical properties, Strength of orthotropic composites, methods of testing, and mechanisms of failure. Behavior of polymers and composites under high

kompozitov, metode preizkušanja in mehanizmi porušitve. Vedenje polimerov in kompozitov pri hitrih obremenitvah. Diskusija in povzetek.	rate-loading. Discussion and summary.
---	---------------------------------------

Temeljna literatura in viri/Readings:

<p>[1] Brostow, W., Corneliussen, R. D.: Failure of plastics.- München: Hanser Publisher, 1986</p> <p>[2] Cheremisinoff, N. P.: Product design and testing of polymeric materials.- New York: Marcel Dekker, Inc., 1990</p> <p>[3] Brüller, O.: Linear and nonlinear characterisation of the behaviour and failure of polymeric materials, Lecture Notes.- Udine: CISM Centre International des sciences mechaniques, 1991</p> <p>[4] KNAUSS, W. W. , Stress Analysis of Fiber-Reinforced Composite Materials, McGraw-Hill, 1998</p>

Cilji in kompetence:

<p>Cilji: Predmet podaja teoretične in eksperimentalne koncepte karakterizacije polimernih in kompozitnih materialov in posebnosti nanokompozitov. Analizirani so konkretni primeri nekaterih konstrukcijskih polimernih materialov.</p> <p>Kompetence: Razumevanje teoretičnega ozadja in eksperimentalnih metod karakterizacije časovno-odvisnih materialov in kompozitov pri statični in dinamični obremenitvi. Splošne kompetence: Obvladanje raziskovalnih metod, postopkov in procesov, razvoj kritične in samokritične presoje. Sposobnost uporabe znanja v praksi. Razvoj komunikacijskih sposobnosti in spretnosti, posebej komunikacije v mednarodnem okolju. Kooperativnost, delo v skupini (in v mednarodnem okolju).</p>	<p>Objectives and competences:</p> <p>Goals: The course reviews theoretical and experimental concepts for characterization of polymeric materials and their composites, emphasizing the specifics of nano-composites. Analyzed are examples of selected structural materials.</p> <p>Competences: Student will Understand theoretical background and experimental techniques for characterization of time-dependent materials and their composites under static and dynamic loading. General Competences: The student will master research methods, procedures and processes. The student will develop critical thinking. The student will develop communications skills to present research achievement in the international environment. Working in teams (in international environment).</p>

Metode poučevanja in učenja:

<p>Predavanja, laboratorijske vaje, seminarsko delo, e-izobraževanje, konzultacije. Seminarsko delo v čim večji meri navezuje se na področje doktorskega raziskovanja. Študij z uporabo priporočene literature.</p>	<p>Learning and teaching methods: Lectures, laboratory practice & seminar work, e-education, consulting. The seminar work is related, as much as possible, to the student's doctoral research field. Study on a recommended literature basis.</p>
---	--

Načini ocenjevanja:

<p>Ustni izpit, poročilo o seminarskem delu. Pogoj za opravljanje ustnega izpita je uspešno izdelano in pozitivno ocenjeno seminarsko delo. Način (projekt, ustno izpraševanje):</p> <ul style="list-style-type: none"> • projekt (seminarska naloga) (60%) • ustno 	<p>Delež/Weight</p>	<p>Assessment: Oral exam, report on seminar work. The condition for admission to oral exam is successful completion of seminar work, rewarded with a passing grade. Method (project, oral examination):</p> <ul style="list-style-type: none"> • project (seminar assignment)
---	----------------------------	---

izpraševanje (40%)	(60%) • oral examination (40%)
