

## UČNI NAČRT PREDMETA/COURSE SYLLABUS

<b>Predmet:</b>	Merilni praktikum
<b>Course title:</b>	Measurement practicum
<b>Članica nosilka/UL Member:</b>	UL FS

Študijski programi in stopnja	Študijska smer	Letnik	Semestri
Strojništvo - projektno aplikativni program, prva stopnja, visokošolski strokovni	Prometni pilot letala/helikopterja (smer)	2. letnik	2. semester
Strojništvo - projektno aplikativni program, prva stopnja, visokošolski strokovni	Snovanje in vzdrževanje letal (smer)	2. letnik	2. semester

<b>Univerzitetna koda predmeta/University course code:</b>	0563998
<b>Koda učne enote na članici/UL Member course code:</b>	3022-V

Predavanja	Seminar	Vaje	Klinične vaje	Druge oblike študija	Samostojno delo	ECTS
30		30			65	5

<b>Nosilec predmeta/Lecturer:</b>	Jože Kutin
-----------------------------------	------------

<b>Vrsta predmeta/Course type:</b>	Obvezni splošni predmet/Compulsory general course
------------------------------------	---

<b>Jeziki/Languages:</b>	Predavanja/Lectures:	Slovenščina
	Vaje/Tutorial:	Slovenščina

<b>Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:</b>	<b>Prerequisites:</b>
--	-----------------------

Izpolnjevanje pogojev za vpis v Visokošolski strokovni študijski program I. stopnje Strojništvo - Projektno aplikativni program.	Meeting the enrollment conditions for the MECHANICAL ENGINEERING - Project Oriented Applied Programme.
--	--

<b>Vsebina:</b>	<b>Content (Syllabus outline):</b>
1. Merjenje in meroslovni sistem – temeljna izhodišča 1 - Pomen inženirskega eksperimentiranja - Področje meroslovja - Vplivni dejavniki v procesu merjenja 2. Merjenje in meroslovni sistem – temeljna izhodišča 2 - Merilni pogrešek vs. merilna negotovost	1. Measurement and metrological system – fundamentals 1 - Importance of engineering experimentation - Field of metrology - Influence factors in measurement process 2. Measurement and metrological system – fundamentals 2 - Measurement error vs. measurement uncertainty

<ul style="list-style-type: none"> <li>- Celovit merilni rezultat</li> <li>- Meroslovna sledljivost</li> <li>- Proces umerjanja oz. kalibracije</li> <li>- Mednarodni sistem merskih enot SI</li> </ul> <p>3. Signalne značilnosti merilnega sistema</p> <ul style="list-style-type: none"> <li>- Analogni in digitalni merilni signali</li> <li>- Prenos merilnih signalov</li> <li>- Šum oz. motnje pri merjenju</li> </ul> <p>4. Temeljni gradniki merilnih sistemov 1</p> <ul style="list-style-type: none"> <li>- Funkcija merilnega zaznavala</li> <li>- Pregled fizikalnih principov merilnih zaznaval</li> <li>- Neelektrična in električna merilna zaznavala za merjenja v strojništву</li> </ul> <p>5. Temeljni gradniki merilnih sistemov 2</p> <ul style="list-style-type: none"> <li>- Funkcija merilnega pretvornika</li> <li>- Merilni ojačevalnik</li> <li>- Frekvenčno sito oz. filter</li> </ul> <p>6. Temeljni gradniki merilnih sistemov 3</p> <ul style="list-style-type: none"> <li>- Analogno-digitalni pretvornik (merilna kartica)</li> <li>- Vplivni parametri pri njihovi izbiri in uporabi, npr. frekvenco vzorčenja, število bitov</li> <li>- Virtualna instrumentacija</li> </ul> <p>7. Statične lastnosti merilnih sistemov 1</p> <ul style="list-style-type: none"> <li>- Statične lastnosti merilnih sistemov</li> <li>- Merilno območje, merilni razpon</li> <li>- Merilna značilnica, merilni model, merilna funkcija</li> <li>- Merilna občutljivost</li> </ul> <p>8. Statične lastnosti merilnih sistemov 2</p> <ul style="list-style-type: none"> <li>- Merilna točnost, merilna natančnost</li> <li>- Nelinearnost, histerezis, ponovljivost</li> <li>- Ločljivost odčitka</li> <li>- Zunanje vplivne veličine</li> <li>- Časovna stabilnost</li> </ul> <p>9. Dinamske lastnosti merilnih sistemov 1</p> <ul style="list-style-type: none"> <li>- Dinamični merilni pogrešek</li> <li>- Eksperimentalno določanje dinamskih lastnosti merilnih sistemov</li> <li>- Dinamični generatorji merjene veličine</li> </ul> <p>10. Dinamske lastnosti merilnih sistemov 2</p> <ul style="list-style-type: none"> <li>- Dinamske lastnosti merilnih sistemov</li> <li>- Časovna konstanta, odzivni čas</li> <li>- Uporabno frekvenčno območje</li> </ul> <p>11. Vrednotenje merilnih rezultatov 1</p> <ul style="list-style-type: none"> <li>- Metodologija vrednotenja merilnih rezultatov</li> <li>- Prepoznavanje potencialnih vplivov</li> <li>- Vplivi lastnosti in načina uporabe merilnega sistema</li> </ul> <p>12. Vrednotenje merilnih rezultatov 2</p> <ul style="list-style-type: none"> <li>- Statistično vrednotenje merilnih rezultatov</li> <li>- Ocena srednje vrednosti</li> <li>- Ocena raztrosa izmerkov, raztrosa srednje vrednosti</li> </ul> <p>13. Vrednotenje merilnih rezultatov 3</p> <ul style="list-style-type: none"> <li>- Skupna standardna in razširjena merilna negotovost</li> <li>- Vrednotenje rezultatov neposrednih merjenj</li> <li>- Vrednotenje rezultatov posrednih merjenj</li> </ul>	<ul style="list-style-type: none"> <li>- Complete measurement result</li> <li>- Metrological traceability</li> <li>- Calibration process</li> <li>- International system of units (SI)</li> </ul> <p>3. Signal characteristics of measuring systems</p> <ul style="list-style-type: none"> <li>- Analog and digital measurement signals</li> <li>- Transmission of measurement signals</li> <li>- Noise and disturbances in measurements</li> </ul> <p>4. Components of measuring systems 1</p> <ul style="list-style-type: none"> <li>- Role of the sensor</li> <li>- Review of physical principles of sensors,</li> <li>- Non-electrical and electrical sensors for measurements in mechanical engineering</li> </ul> <p>5. Components of measuring systems 2</p> <ul style="list-style-type: none"> <li>- Role of measuring transmitter</li> <li>- Measuring amplifiers</li> <li>- Frequency filters</li> </ul> <p>6. Components of measuring systems 3</p> <ul style="list-style-type: none"> <li>- Role of analog-digital converter (data acquisition device)</li> <li>- Influential parameters on their selection and application, e.g., sampling frequency, number of bits.</li> <li>- Virtual instrumentation</li> </ul> <p>7. Static characteristics of measuring systems 1</p> <ul style="list-style-type: none"> <li>- Static characteristics of measuring systems</li> <li>- Measuring range, measuring span</li> <li>- Measuring characteristic, measurement model, measurement function</li> </ul> <p>8. Static characteristics of measuring systems 2</p> <ul style="list-style-type: none"> <li>- Measurement sensitivity</li> <li>- Measurement accuracy, precision</li> <li>- Nonlinearity, hysteresis, repeatability</li> <li>- Resolution</li> <li>- External influential quantities</li> <li>- Time stability</li> </ul> <p>9. Dynamic characteristics of measuring systems 1</p> <ul style="list-style-type: none"> <li>- Dynamic measurement error</li> <li>- Experimental determination of dynamic measurement characteristics</li> <li>- Dynamic generators of measured quantity</li> </ul> <p>10. Dynamic characteristics of measuring systems 2</p> <ul style="list-style-type: none"> <li>- Dynamic characteristics of measuring systems</li> <li>- Time constant, response time</li> <li>- Useful frequency range</li> </ul> <p>11. Evaluation of measurement results 1</p> <ul style="list-style-type: none"> <li>- Methodology for evaluation of measurement results</li> <li>- Recognizing potential influences</li> <li>- Influences related to characteristics of measuring system and the way of its usage</li> </ul> <p>12. Evaluation of measurement results 2</p> <ul style="list-style-type: none"> <li>- Statistical evaluation of measurement results</li> <li>- Estimating the mean value</li> <li>- Estimating the scatter of measured values, scatter of the mean value</li> </ul>
--	--

<ul style="list-style-type: none"> <li>- Vrednotenje rezultatov primerjalnih merjenj</li> </ul> <p>14. Obvladovanje merilnega sistema in procesa merjenja – izbrani primeri 1</p> <ul style="list-style-type: none"> <li>- Izbrani primeri merjenj v strojništvu</li> <li>- Merjenje deformacij, sil, navora itd. z uporavnimi merilnimi lističi</li> <li>- Konfiguracija merilnega sistema</li> <li>- Vplivne veličine na kakovost merjenja</li> </ul> <p>15. Obvladovanje merilnega sistema in procesa merjenja – izbrani primeri 2</p> <ul style="list-style-type: none"> <li>- Merjenje mehanskih nihanj, tlakov itd. s piezoelektričnimi merilnimi zaznavalci</li> <li>- Konfiguracija merilnega sistema</li> <li>- Vplivne veličine na kakovost merjenja</li> <li>- Drugi možni primeri: merjenje z induktivnimi, kapacitivnimi, optičnimi merilnimi sistemi</li> </ul>	<p>13. Evaluation of measurement results 3</p> <ul style="list-style-type: none"> <li>- Combined standard and expanded measurement uncertainty</li> <li>- Evaluation of results of direct measurements</li> <li>- Evaluation of results of indirect measurements</li> <li>- Evaluation of results of comparison measurements</li> </ul> <p>14. Management of measuring system and measurement process – case study 1</p> <ul style="list-style-type: none"> <li>- Selected cases of measurements in mechanical engineering</li> <li>- Measurements of deformation, force, torque, etc., using strain gauges</li> <li>- Configuration of measuring system</li> <li>- Influences on quality of measurement</li> </ul> <p>15. Management of measuring system and measurement process – case study 2</p> <ul style="list-style-type: none"> <li>- Measurements of vibration, pressure, etc., using piezoelectric sensors</li> <li>- Configuration of measuring system</li> <li>- Influences on quality of measurement</li> <li>- Other potential cases: measurements using inductive, capacitive, optical measuring systems</li> </ul>

#### Cilji in kompetence:

<p>Cilji:</p> <ol style="list-style-type: none"> <li>1. Spoznati področje meroslovja in temeljne meroslovne pojme</li> <li>2. Spoznati temeljne gradnike in izhodišča načrtovanja merilnih sistemov s področja merjenj v strojništvu</li> <li>3. Razumeti ključne parametre za popis statičnih in dinamičnih lastnosti merilne opreme in merilnih sistemov</li> <li>4. Spoznati vplivne dejavnike v procesu merjenja in izhodišča vrednotenja merilnih rezultatov</li> </ol> <p>Kompetence:</p> <ol style="list-style-type: none"> <li>1. S10-PAP: Sposobnost strokovnega sporazumevanja in pisnega izražanja na področju meroslovja.</li> <li>2. P4-PAP: Pozna osnovne merilne instrumente in merilne verige za merjenje osnovnih veličin na področju strojništva.</li> </ol>	<p>Objectives and competences:</p> <p>Objectives:</p> <ol style="list-style-type: none"> <li>1. To familiarize with the field of metrology and metrological terminology</li> <li>2. To familiarize with components and design of measuring systems in the field of measurements in mechanical engineering</li> <li>3. To understand key parameters for description of static and dynamic characteristics of measuring instruments and measuring systems</li> <li>4. To familiarize with influence parameters in measurement process and fundamentals of evaluation of measurement results</li> </ol> <p>Competences:</p> <ol style="list-style-type: none"> <li>1. S10-PAP: The ability to communicate professionally and express oneself in writing..</li> <li>2. P4-PAP: Knowing the basic measuring instruments</li> </ol>
--	---

<p>3. S1-PAP + S5-PAP + P9-PAP: Sposobnost uporabe pridobljenih znanj pri načrtovanju meritnih sistemov, izvajanju meritev in vrednotenju meritnih rezultatov.</p>	<p>and measuring chains used to measure the basic quantities in the field of mechanical engineering.</p> <p>3. S1-PAP + S5-PAP + P9-PAP: The ability to use the acquired knowledge for designing of measuring systems, performing measurements and evaluation of measurement results</p>
--	--

#### Predvideni študijski rezultati:

Znanja:

Z1: Poglobljeno strokovno teoretično in praktično znanje na določenem področju, podprto s širšo teoretično in metodološko osnovo.

- Znanje o procesu merjenja, s poudarkom na metodologiji izbire meritne opreme, načrtovanju meritnih sistemov ter obvladovanju kakovosti merjenj in vrednotenja meritnih rezultatov

Spretnosti:

S1.1 Izvajanje kompleksnih operativno-strokovnih opravil, ki vključujejo tudi uporabo metodoloških orodij.

- Načrtovanje meritnih sistemov želene meritne točnosti, dinamičnih lastnosti itd.

S1.2 Obvladovanje zahtevnih, kompleksnih delovnih procesov ob samostojni uporabi znanja v novih delovnih situacijah.

- Obvladovanje izbire meritne opreme in vplivov na proces merjenja

S1.3 Diagnosticiranje in reševanje problemov v različnih specifičnih delovnih okoljih, povezanih s področjem izobraževanja in usposabljanja.

- Reševanje problemov s področja vrednotenja meritnih rezultatov.

#### Intended learning outcomes:

Outcomes:

Z1: Thorough professional theoretical and practical knowledge in a selected field of expertise that is supported with a broad theoretical and methodological basis.

- Knowledge about measurement processes with emphasis on methodology of selection of measuring instruments, design of measuring systems, management of measurement quality and evaluation of measurements results.

Skills:

S1.1 Executing complex operationa-professional tasks that incorporate usage of methodological tools.

- Design of measuring systems with target measurement accuracy, dynamic characteristics, etc.

S1.2 Mastering demanding and complex work processes by independent usage of knowledge in new working situations.

- Management of selection of measuring instruments, management of influences on measurement process.

S1.3 Problem diagnostics and solving in different and specific working environments that are linked to the teaching and training content.

- Solving problems related to evaluation of measurement results.

#### Metode poučevanja in učenja:

P1 Avditorna predavanja z reševanjem izbranih - za področje značilnih - teoretičnih in praktično uporabnih primerov.

P4 Laboratorijske vaje z namenskimi didaktičnimi pripomočki (merilni sistemi s področja merjenj v strojništву, računalniško nadzorovani meritni sistemi, meritni sistemi za statična in dinamična merjenja).

P6 Interaktivna predavanja

P9 Skupinsko delo

P14 Virualni eksperimenti

#### Learning and teaching methods:

P1 Auditorial lectures with solving selected field-specific theoretical and applied use cases.

P4 Laboratory exercises with special-purpose didactic devices (measuring systems applicable in mechanical engineering, computer controlled measuring systems, measuring systems for static and dynamic measurements).

P6 Interactive lectures.

P9 Team work

P14 Virtual experiments.

P15 Uporaba video vsebin kot priprava na predavanja in vaje	P15 Application of videos for preparations to the lectures and exercises.

**Načini ocenjevanja:** **Delež/Weight** **Assessment:**

Pisno ocenjevanje teorije	45,00 %	Written examination of theory
Praktično delo na vajah	45,00 %	Practical work on exercises
Ustni zagovor	10,00 %	Oral examination
