

## PAMETNA MESTA

### UČNI NAČRT PREDMETA/COURSE SYLLABUS

<b>Predmet:</b>	Pametna mesta
<b>Course title:</b>	SMART CITIES
<b>Članica nosilka/UL Member:</b>	UL FS

Študijski programi in stopnja	Študijska smer	Letnik	Semestri	Izbirnost
Strojništvo - Razvojno raziskovalni program, druga stopnja, magistrski (od študijskega leta 2024/2025 dalje)	Procesno strojništvo (smer)	2. letnik	1. semestri	obvezni

<b>Univerzitetna koda predmeta/University course code:</b>	0566927
<b>Koda učne enote na članici/UL Member course code:</b>	6022-M

Predavanja /Lectures	Seminar /Seminar	Vaje /Tutorials	Klinične vaje /Clinical tutorials	Druge oblike študija /Other forms of study	Samostojno delo /Individual student work	ECTS
30		30			65	5

<b>Nosilec predmeta/Lecturer:</b>	Andrej Kitanovski, Ciril Arkar
-----------------------------------	--------------------------------

<b>Izvajalci predavanj:</b>	
<b>Izvajalci seminarjev:</b>	
<b>Izvajalci vaj:</b>	
<b>Izvajalci kliničnih vaj:</b>	
<b>Izvajalci drugih oblik:</b>	
<b>Izvajalci praktičnega usposabljanja:</b>	

<b>Vrsta predmeta/Course type:</b>	Obvezni strokovni predmet na smeri Procesno strojništvo, ki je izbirni strokovni predmet na ostalih smereh./Compulsory specialised course in the study of Process Engineering, which is an elective specialised course in other fields of study.
------------------------------------	--

<b>Jeziki/Languages:</b>	Predavanja/Lectures: Slovenščina
	Vaje/Tutorial: Slovenščina

**Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:**

Izpolnjevanje pogojev za vpis v Magistrski študijski program II. stopnje Strojništvo - Razvojno raziskovalni program.	Meeting the enrollment conditions for the Master's study programme of Mechanical Engineering - Research and Development program.
---	--

**Vsebina:**

1. Trajnostna in pametna mesta: - koncepti in razlike trajnostnih in pametnih mest, - kazalniki in primeri integracije trajnostnih in pametnih gradnikov mest v pametnih mestih, - nizkoogljični in obnovljivi viri energije za trajnostno oskrbo mest. 2. Modeliranje toplotnega odziva mest: - modeliranje mikroklima v mestih, - ukrepi za blaženje toplotnih otokov, - vpliv mikroklimatskih razmer v mestih na rabo energije, - primeri ENVIMET. 3. Koncepti za izboljšanje kakovosti okolja v pametnih mestih: - modeliranje tokov onesnažil v zunanjem okolju, - vpliv pametnih gradnikov na indeks počutja in zdravega bivanja, - vpliv energetskih sistemov na kakovost bivanja, - vpliv naravnih gradnikov na kakovost bivanja mestih, - primeri ENVIMET. 4. Tehnologije in sistemi za distribucijo energij v pametnih mestih:	1. Sustainable and smart cities: - concepts and types of sustainable and smart cities; - indicators and cases of implementation of sustainable and smart building blocks in smart cities; - low-carbon and renewable energy sources for sustainable supply of cities. 2. Modelling the thermal response of cities: - urban microclimate; - measures for mitigation of urban heat islands; - impact of microclimate on the energy demand in cities; - ENVIMET case studies. 3. Concept and measures for improvement of outdoor environment in smart cities: - models for determination of pollutant propagation in outdoor environment; - influence of smart building blocks on wellbeing and health index; - influence of energy supply systems on outdoor living comfort in smart cities; - influence of greened building blocks on outdoor living comfort in smart cities;
---	---

**Prerequisites:**

<ul style="list-style-type: none"> <li>- koncepti razvoja pametnih distribucijskih sistemov,</li> <li>- pregled vseh sistemov za oskrbo mest s toploto, hladom, plinom in elektriko.</li> </ul> <p>5. Sistemi daljinskega ogrevanja</p> <ul style="list-style-type: none"> <li>- toplotne podpostaje,</li> <li>- toplotne izgube, optimalna debelina izolacije, temperaturni režim, ukrepi za znižanje temperature povratka,</li> <li>- sistemska voda, črpalne postaje in hidravlične razmere,</li> <li>- varnost, zanesljivost, energijska učinkovitost</li> <li>- načrtovanje sistemov daljinskega ogrevanja.</li> </ul> <p>6. Sistemi daljinskega hlajenja</p> <ul style="list-style-type: none"> <li>- proizvodnja hladu za daljinsko hlajenje,</li> <li>- preračun cevne mreže daljinskega hlajenja,</li> <li>- varnost, zanesljivost, energijska učinkovitost</li> <li>- načrtovanje sistemov daljinskega ogrevanja.</li> </ul> <p>7. Plinovodna omrežja</p> <ul style="list-style-type: none"> <li>- magistralni cevovodi, distribucijsko omrežje, armature,</li> <li>- vzdrževanje tlaka, reducirne postaje in ekspanzijsko pridobivanje dela,</li> <li>- kompresorske postaje, hranilniki plinavarnost, zanesljivost</li> <li>- načrtovanje plinovodnih omrežij.</li> </ul> <p>8. Električna omrežja v mestih</p> <ul style="list-style-type: none"> <li>- prenosna omrežja in pomen,</li> <li>- pametna električna omrežja.</li> </ul> <p>9. Dinamični in vremensko voden modeli upravljanja sistemov daljinske energetike 1</p> <ul style="list-style-type: none"> <li>- dinamično modeliranje hranilnikov toplote, hladu in električne energije v integralnih sistemih energijske oskrbe,</li> <li>- dinamično modeliranje proizvodnih enot.</li> </ul> <p>10. Dinamični in vremensko voden modeli upravljanja sistemov daljinske energetike 2</p> <ul style="list-style-type: none"> <li>- zajem podatkov, obdelava podatkov, daljinsko vodenje, nadzor, napovedovanje odjema energentov iz distribucijskega</li> <li>- pametno upravljanje delovanja</li> </ul>	<p>-ENVIMET case studies.</p> <p>4. Technologies and systems for energy distribution in smart cities:</p> <ul style="list-style-type: none"> <li>- design concepts of smart distribution systems;</li> <li>- overview of systems for heat, cold, gas and electricity supply in smart cities.</li> </ul> <p>5. District heating systems:</p> <ul style="list-style-type: none"> <li>- substations;</li> <li>- heat losses and optimal thermal insulation of distribution systems, operating temperature regimes, measures for increasing of energy efficiency of distribution systems;</li> <li>- pump stations;</li> <li>- reliable, safe and energy efficient operation;</li> <li>- design of district heating systems.</li> </ul> <p>6. District cooling systems:</p> <ul style="list-style-type: none"> <li>- cold production for district cooling systems;</li> <li>- energy efficiency of district cooling systems;</li> <li>- design of pipeline network;</li> <li>- reliable, safe and energy efficient operation;</li> <li>-design of district cooling systems.</li> </ul> <p>7. Gas pipelines</p> <ul style="list-style-type: none"> <li>- main pipelines, networks, appliances;</li> <li>- pressure maintenance, reduction gas substations, expansion work;</li> <li>- compressor stations, gas storages;</li> <li>- reliable and safe operation;</li> <li>- design of gas networks.</li> </ul> <p>8. Electricity distribution systems:</p> <ul style="list-style-type: none"> <li>- overview of transmission networks;</li> <li>- smart electrical networks and systems.</li> </ul> <p>9. Dynamic and weather prediction models for control of district energy supply systems 1:</p> <ul style="list-style-type: none"> <li>- transient modelling of heat, cold and electricity storages in total energy supply systems;</li> <li>- transient modelling of energy production.</li> </ul> <p>10. Dynamic and weather prediction models for control of district energy supply systems 2:</p> <ul style="list-style-type: none"> <li>- operation data assessment, distant control and management, prediction demand control;</li> </ul>
--	---

<p>sistemov daljinske energetike.</p> <p>11. Upravljanje z vodo in odpadki v pametnih mestih</p> <ul style="list-style-type: none"> <li>- tehnologije ravnanja, pametno upravljanje, siva in črna voda in odpadki kot emergent.</li> </ul> <p>12. Vodila in metode načrtovanja in presoje nič energijskih stavb</p> <ul style="list-style-type: none"> <li>- tehnologije energijske samooskrbe pametnih stavb v mestih;</li> <li>- podporne tehnologije za zagotavljanje energijske samozadostnosti stavb.</li> </ul> <p>13. Koncept pametnih stavb in podporne tehnologije</p> <ul style="list-style-type: none"> <li>- internet stvari, indeks pripravljenosti stavb na pametna omrežja (SRI),</li> <li>- metode vrednotenja SRI,</li> <li>- pomen informacijskih tehnologij ter VR in AR tehnik za načrtovanje stavb.</li> </ul> <p>14. Modeliranje pametnih tehničnih stavbnih sistemov v pametnih stavbah</p> <ul style="list-style-type: none"> <li>- metode modeliranja,</li> <li>- računalniški modeli,</li> <li>- EPBD kazalniki energijske učinkovitosti stavb.</li> </ul> <p>15. Napredno spremljanje kakovosti bivalnega ugodja, energijskih in snovnih tokov v pametnih mestih</p> <ul style="list-style-type: none"> <li>- pametni monitoring,</li> <li>- tehnologije monitoringa,</li> <li>- vpliv BAC na energijsko učinkovitost stavb in mest.</li> </ul>	<ul style="list-style-type: none"> <li>- smart control of district energy systems.</li> </ul> <p>11. Water and waste management in smart cities:</p> <ul style="list-style-type: none"> <li>- concepts, smart management, grey and black water treatment, waste as energy source.</li> </ul> <p>12. Guidelines and design roles for nearly and nett zero energy buildings:</p> <ul style="list-style-type: none"> <li>- concepts and technologies for energy self-sufficient smart buildings;</li> <li>- measures and supporting technologies for energy self-sufficient smart buildings.</li> </ul> <p>13. Smart buildings:</p> <ul style="list-style-type: none"> <li>- internet of things, adaptation of buildings towards smart buildings;</li> <li>- building smartness indicator (SRI)</li> <li>- information technologies, VR and AR techniques for supporting the building design.</li> </ul> <p>14. Modelling of smart building service systems:</p> <ul style="list-style-type: none"> <li>- modelling approaches;</li> <li>- computer tools;</li> <li>- EPBD indicators of buildings energy efficiency.</li> </ul> <p>15. Advanced and adaptive indoor living environment design, energy and sustainability monitoring in buildings:</p> <ul style="list-style-type: none"> <li>- smart monitoring techniques;</li> <li>- monitoring technologies;</li> <li>- supporting sustainability and energy efficiency by IT.</li> </ul>

**Cilji in kompetence:**

Cilji:

1. Spoznati koncepte načrtovanja, lastnosti gradnikov in vodenja tehničnih sistemov v pametnih mestih.
2. Spoznati koncepte in podporne tehnologije pametnih in nič energijskih stavb ter osvojiti znanja za njihovo energetsko modeliranje in presojo.
3. Pridobiti znanje na področju modeliranja in vodenja sistemov energijske oskrbe v pametnih mestih in pametnih stavbah.

Kompetence:

1. Širitev sposobnosti kritičnega, analitičnega in sintetičnega mišljenja. Razvijanje novega znanja in razumevanje področja pametnih mest, pametnih tehničnih sistemov in pametnih stavb (S1-MAG+P1-MAG)
2. Usposobljenost za delo v skupini in interdisciplinarno povezovanje. (S9-MAG+P4-MAG)

**Objectives and competences:**

Education goals:

1. Learn about concepts, building blocks and management of technology systems in smart cities.
2. Learn about concepts and supporting technologies of smart and nearly/nett energy buildings and gain the knowledge for energy modelling and evaluation of smart buildings.
3. Learn about concepts for modelling and management of district energy supply systems in smart cities and smart buildings.

Competence:

1. S1-RRP, P1-RRP The ability to define, understand and creatively solve professional challenges in field of smart cities, smart technical systems and smart buildings and mastering of basic theoretical skills for design and assessment of smart cities and smart buildings.
2. S9-RRP, P4-PPR Adherence to safety, functional, economic and environmental principles in study field.

**Predvideni študijski rezultati:**

Znanja:

Z2. Poglobljeno teoretično, metodološko in analitično znanje z elementi raziskovanja, ki je osnova za razumevanje konceptov načrtovanja in vrednotenja pametnih mest in modeliranja gradnikov z vidika trajnostne energetike in ravnanja s snovmi.

Spretnosti:

S2.1. Obvladovanje zelo zahtevnih kompleksnih procesov načrtovanja in

**Intended learning outcomes:**

Knowledge:

Z2: Thorough theoretical, methodological, analytical knowledge with elements of research work that form a basis for very demanding professional work.

Skills:

S2.1 Mastering very demanding and complex work processes and methodological tools in specialised professional fields of energy supply and material flows treatment.

<p>pričetje energetskih procesov in okoljevarstvenih ukrepov z uporabo numeričnih orodij na področju energijske oskrbe in ravnanja s snovmi v pametnih mestih.</p> <p>S2.2. Uporaba računalniških podpornih tehnologij za načrtovanje pametnih mest, omrežij in stavb.</p>	<p>S2.1 Mastering very demanding and complex work processes and methodological tools in specialised professional fields of design and management of smart cities and smart buildings.</p>

### Metode poučevanja in učenja:

### Learning and teaching methods:

<p><i>Klasične oblike poučevanja</i></p> <p>P1 Avditorna predavanja z reševanjem izbranih - za področje značilnih - teoretičnih in praktično uporabnih primerov.</p> <p>P3 Avditorne vaje, kjer se teoretično znanje s predavanj podkrepi z računskimi primeri.</p> <p>P4 Laboratorijske vaje z namenskimi didaktičnimi pripomočki z dostopom na daljavo.</p> <p><i>Moderne oblike poučevanja</i></p> <p>P6 Interaktivna predavanja</p> <p>P8 Izdelava in predstavitev aplikativnih seminarских nalog</p> <p>P15 Uporaba video vsebin kot priprava na predavanja in vaje</p>	<p>Coventional teaching methods:</p> <p>P1: Auditorial lectures with solving selected field-specific theoretical and applied use cases.</p> <p>P3: Auditorial exercises, in which theoretical content from lectures is supported with practical examples.</p> <p>P4. Laboratory work with dedicated computer tools and test equipment with remote access.</p> <p>Contemporary and flexible teaching methods:</p> <p>P6: Interactive lectures.</p> <p>P8. Making and presenting applied seminar exercises.</p> <p>P15. Application of multimedia presentations for preparation to the lectures and exercises.</p>
--	--

### Načini ocenjevanja:

### Delež/ Weight

### Assessment:

Teoretične vsebine (predavanja).	50,00 %	Theory.
Samostojno delo na vajah.	25,00 %	Tutorials.
Seminar.	25,00 %	Individual seminar work.

### Ocenjevalna lestvica:

### Grading system:

5 - 10, pri čemer velja, da je pozitivna ocena od 6 - 10	5 - 10, a student passes the exam if he is graded from 6 to 10
