

TEHNIČNO RISANJE IN RAČUNALNIŠKO MODELIRANJE GEOMETRIJE

UČNI NAČRT PREDMETA/COURSE SYLLABUS

Predmet:	Tehnično risanje in računalniško modeliranje geometrije
Course title:	Technical drawing and computer aided modelling of geometry
Članica nosilka/UL Member:	UL FS

Študijski programi in stopnja	Študijska smer	Letnik	Semestri	Izbirnost
Strojništvo - razvojno raziskovalni program, prva stopnja, univerzitetni	Ni členitve (študijski program)	1. letnik	1. semester	obvezni

Univerzitetna koda predmeta/University course code:	0577579
Koda učne enote na članici/UL Member course code:	2005-U

Predavanja /Lectures	Seminar /Seminar	Vaje /Tutorials	Klinične vaje /Clinical tutorials	Druge oblike študija /Other forms of study	Samostojno delo /Individual student work	ECTS
45		30			50	5

Nosilec predmeta/Lecturer:	Jovan Trajkovski, Nikola Vukašinović, Robert Kunc
-----------------------------------	---

Izvajalci predavanj:	
Izvajalci seminarjev:	
Izvajalci vaj:	
Izvajalci kliničnih vaj:	
Izvajalci drugih oblik:	
Izvajalci praktičnega usposabljanja:	

Vrsta predmeta/Course type:	Obvezni splošni predmet /Compulsory general course
------------------------------------	--

Jeziki/Languages:	Predavanja/Lectures:	Slovenščina
	Vaje/Tutorial:	Slovenščina

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

1. Predznanje srednješolske in osnovnošolske matematike
2. Ravninska opisna geometrija
3. Osnovno poznavanje postopkov obdelave materialov
4. Poznavanje dela z računalnikom
5. Osnove izdelovalnih tehnologij

Prerequisites:

1. Prior knowledge of secondary and primary mathematics.
2. Plane (2D) descriptive geometry.
3. Basic knowledge of material treatment processes.
4. Basic computer skills.
5. Basic knowledge about manufacturing technologies.

Vsebina:

1. Predavanje: Osnove ročne in računalniške izdelave tehnične dokumentacije
 - Temeljna načela ISO
 - Načini prikazovanja, modeli, vrste risb
 - Standardi ISO za TD in GPS
2. Predavanje: Prikazovanje predmetov na tehničnih risbah
 - Vrste projekcij na TR po ISO standardih
 - Tehnično skiciranje in računalniško risanje
 - Večpogledne projekcije po ISO in ASME in aksonometrične projekcije
3. Predavanje: Prikazovanje predmetov na delavniških in sestavnih/glavnih risbah in kotiranje
 - Pogledi, prerezi ter posebnosti
 - Elementi in oprema delavniških risb
 - Elementi in oprema sestavnih/glavnih risb
 - Kotiranje - 1
4. Predavanje: Kotiranje in osnove toleriranja in ujemov

Content (Syllabus outline):

1. Lecture: Basics of manual and computer-aided design of technical documentation
 - Basic principles of ISO.
 - Methods of presentation, models, types of drawings.
 - ISO standards for TD and GPS.
2. Lecture: Presenting objects in technical drawings
 - Types of projections in technical drawings according to ISO standards.
 - Technical sketching and computer-aided drawing.
 - Multiview projections in accordance with ISO and ASME and axonometric projections.
3. Lecture: Presenting objects in workshop and assembly/main drawings and dimensioning
 - Projections, sections and specificities.
 - Elements and symbolic description of workshop drawings.
 - Elements and symbolic description of assembly/main drawings.
 - Dimensioning - 1

<ul style="list-style-type: none"> • Kotiranje - 2 • Posebni pogledi • Posnetja in stanja robov • Tolerance dolžinskih mer in kotov (splošne in posebne) <p>5. Predavanje: Risanje standardiziranih oblik in elementov</p> <ul style="list-style-type: none"> • Navoji in vijačne zveze • Osi in gredi • Gredne zveze • Ležaji in tesnila <p>6. Predavanje: ISO tolerance in ujemi ter Geometrijske tolerance (GT)</p> <ul style="list-style-type: none"> • ISO tolerance in ujemi • Načela in elementi geometrijskega toleriranja • Vrste geometrijskih toleranc (GT) • Podajanje geometrijskih toleranc na risbah <p>7. Predavanje: Označevanje kakovosti površin ter risanje varjencev</p> <ul style="list-style-type: none"> • Označevanje kakovosti površin • Usklajevanje hrapavosti površin s tolerancami • Obdelovalni postopki in stopnje hrapavosti • Značilnosti risb varjencev, prikaz varjencev, risanje in označevanje zvarov <p>8. Predavanje: Risanje ulitkov in odkovkov ter osnove pravil tehnične dokumentacije na 3D geometrijskih modelih (MBD načela)</p> <ul style="list-style-type: none"> • Značilnosti delavnikih risb ulitkov in odkovkov • Simbolika zahtev TR na 3D in 2D geometrijskih modelih ter risbah • Posebnosti • Prednosti in slabosti <p>9. Predavanje: Opredelitev 3D modeliranja in skiciranje v modelirnikih</p> <ul style="list-style-type: none"> • Osnove računalniške grafike, • Opredelitev 3D prostora v CAD, • Koordinatni sistemi, • Osnove 3D geometrije, • Pozicioniranje skic v prostor • Uporaba topoloških elementov za 	<p>4. Cilji in kompetence:

Cilji:

1. Pridobiti teoretično in praktično znanje s področja računalniškega tehničnega risanja in 3D modeliranja
2. Spoznati uporabo specializiranih programskih orodij za tehnično risanje in 3D modeliranje
3. Spoznati ključne veljavne standarde s področja tehnične dokumentacije
4. Razumeti modeliranje in tehnično risanje kot delovni proces za zagotavljenje želenih funkcij izdelka pri konstruiranju izdelkov.
5. Spoznati povezavo med procesom konstruiranja, procesom 3D modeliranja, tehničnega risanja in tehnološkimi procesi izdelave izdelka.
6. Spoznati in znati samostojno uporabljati razpoložljive tehnologije, algoritme in naprave, ki omogočajo predstavitev izdelkov v prostoru.
7. Pridobiti popolno poznavanje vsaj enega modelirnika z njegovimi karakteristikami.

Kompetence:

1. S1-RRP + P1-RRP: Sposobnost opredelitve in razumevanja izzivov z uporabo temeljnih teoretičnih znanj s področja strojništva.
2. S4-RRP: Sposobnost strokovnega sporazumevanja in pisnega izražanja.
3. S5-RRP: Sposobnost uporabe informacijsko-komunikacijske tehnologije.
4. S5-RRP + P2-RRP: Obvladovanja virtualnega 3D prostora, kot delovnega okolja sodobnih inženirskeh znanosti.
5. S6-RRP + P6-RRP: Razumevanje in kompetence za sistemsko obravnavo izdelkov, opredeljevanje posameznih funkcij in njihovo integrirano

Objectives and competences:

Objectives:

1. Gaining theoretical and practical knowledge of computer-aided technical drawing and 3D modelling.
2. Learning to use specialised software tools for technical drawing and 3D modelling.
3. Understanding key applicable standards in the field of technical documentation.
4. Understanding modelling and technical drawing as the work process in product design procedure used to ensure desired functions of a product.
5. Learning the relations between design process, 3D modelling, technical drawing and technological processes of product creation.
6. Learning and being able to independently use available technologies, algorithms and devices, which enable representation of products in space.
7. Gaining full competences for using at least one 3D CAD modeler.

Competences:

1. S1-RRP + P1-RRP: The ability to identify and understand the challenges of using fundamental theoretical knowledge in the field of mechanical engineering.
2. S4-RRP: Good professional communication and writing skills.
3. S5-RRP: The ability to use the information and communications technology.
4. S5-RRP + P2-RRP: The ability to work in virtual 3D space as a working environment of modern engineering sciences.
5. S6-RRP + P6-RRP: Understanding

<p>obdelavo v sistemih, kar je pogoj za pristop h konstruiranju.</p> <p>6. S1-RRP + P4-RRP: Uporaba obstoječih algoritmov za predstavitev geometrijskih gradnikov in združevanje v gradnike višjega reda. Uporaba algoritmov za geometrijske transformacije v 3D prostoru.</p> <p>7. S5-RRP + P2-RRP: Uporaba najmanj enega modelirnika ter razumevanje delovanja večine sodobnih modelirnikov z minimalno potrebno priučitvijo za njihovo rutinsko uporabo.</p>	<p>and competences for systematic handling of products, characterisation of individual functions and their integration into systems as a condition for successful modelling and design process.</p> <p>6. S1-RRP + P4-RRP: Application of existing algorithms for representation of geometrical building blocks and their merging into the blocks of higher complexity level. Application of geometric transformations in 3D space.</p> <p>7. S5-RRP + P2-RRP: Use of at least one 3D modeller and principle understanding of most of modern modeller with minimal required training for their routine use.</p>
--	---

Predvideni študijski rezultati:

Znanja:

Z1: Poglobljeno strokovno teoretično in praktično znanje na področju tehničnega risanja in računalniškega modeliranja geometrije, podprtlo s širšo teoretično in metodološko osnovo:

Spretnosti:

S1.1 Izvajanje kompleksnih operativno-strokovnih opravil, ki vključujejo tudi uporabo metodoloških orodij:

- Branje tehničnih risb in razumevanje prostorskih oblik na osnovi 2D risb.
- Izdelava tehničnih rib na osnovi prostorskih modelov.
- Uporaba veljavnih standardov pri opremljanju tehničnih risb

S1.2 Obvladovanje zahtevnih, kompleksnih delovnih procesov ob samostojni uporabi znanja v novih delovnih situacijah:

- Izdelava geometrijskih 3D modelov
- razumevanje in uporabo 3D modeliranja za potrebe reševanja osnovnih inženirskih konstrukcijskih problemov.
- Razvoj veščin, potrebnih za sistemski pristop k razvoju izdelkov in/ali

Intended learning outcomes:

Knowledge:

Z1: In-depth professional theoretical and practical knowledge in the field of technical drawing and computer-aided geometric modelling, supported by a wide theoretical and methodological basis.

Skills:

S1.1 Performance of complex operational and specialist tasks, including the use of methodological tools:

- Reading technical drawings and understanding spatial forms based on 2D drawings.
- Designing technical drawings based on 3D models.
- Use of applicable standards in creating symbolic descriptions for technical drawings.

S1.2 Handling difficult, complex working principles by independent application of knowledge in new working situations:

- Creation of geometric 3D models
- Understanding and use of 3D modelling for solving basic design engineering problems.

projektiranju.	<ul style="list-style-type: none"> • Development of skills which are necessary for systematic approach to development of products and planning.
----------------	--

Metode poučevanja in učenja:	Learning and teaching methods:
P1 Avditorna predavanja z reševanjem izbranih - za področje značilnih - teoretičnih in praktično uporabnih primerov.	P1 Auditory lectures with solving selected and typical theoretical and practical examples.
P2 Obravnava snovi po urejeni in vnaprej razloženi sistematiki.	P2 Presentation of a subject matter based on the arranged and previously explained scheme.
P4 Laboratorijske vaje tehničnega risanja in 3D modeliranja z namenskimi didaktičnimi pripomočki:	P4 Laboratory exercises of technical drawing and 3D modelling with dedicated didactic aids:
<ul style="list-style-type: none"> • Računalniške delovne postaje s programskimi paketi za modeliranje in izdelavo tehničnih risb. 	<ul style="list-style-type: none"> • Computer workstations with software packages for modeling and drawing technical drawings.
P8 Izdelava in predstavitev aplikativnih seminarских nalog.	P8 Creation and presentation of applicative seminar assignments.
P12 Individualizirane domače naloge v spletni učilnici.	P12 Individual homework assignments in a virtual classroom.
P14 Virtualne predstavitev.	P14 Virtual presentations.
P15 Uporaba video vsebin kot priprava na predavanja in vaje.	P15 Use of video contents as preparation for lectures and tutorials.

Načini ocenjevanja:	Delež/ Weight	Assessment:
Teoretični izpit (pisno/ustno)	50,00 %	Theory examination (written/oral).
Delo na laboratorijskih vajah (vključno z izdelki)	35,00 %	Practical examination in laboratory (written/oral).
Projektna naloga (pisno)	15,00 %	Project work (written).
